

### REMARKS

In the Office communication of July 2, 2007, the Examiner objected to Applicant's Amendment and Response of April 17, 2007 as being non-responsive. Specifically, the Examiner objected that the hydrogen at position 11a in the formula recited in claim 36 had been replaced with a methyl group, and that the addition of C1, C2 and C3 to the formula recited in claim 36 were not shown as marked.

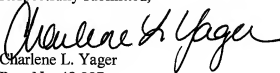

The formula recited in claim 36 has been amended to correct a typographical error. Applicant's representative inadvertently left out the hydrogen at position 11a in claim 36. In addition, changes to the formula recited in claim 36 (i.e., the addition of C1, C2 and C3), introduced in the amendment of April 17, 2007 without markings, are herein shown underlined.

In preparing the current claim set, Applicants have treated the amendment filed April 17, 2007 as if it had been entered. Consequently, changes shown correctly marked in that response are herein shown unmarked. Applicants have corrected the formula recited in claim 36, as detailed above, to address the Examiner's objection. Applicants request withdrawal of the objection.

### CONCLUSION

It is believed that this application is now in condition for allowance. The Examiner is strongly encouraged to contact the undersigned at the phone number below should any issues remain with respect to the application.

Respectfully submitted,

Charlene L. Yager
